

CHANGE FOR THE
BETTER WITH
ENERGY STAR

Buildings that earn the ENERGY STAR® prevent greenhouse gas emissions by meeting strict energy efficiency guidelines set by the U.S. Environmental Protection Agency.

ENERGY STAR REGIONAL NETWORKING MEETING

June 21, 2006

8:30am – 2:30pm

U.S. EPA Region 8
Denver Place Towers
999 18th Street
Denver, Colorado

With the volatility and uncertainty of energy prices, building owners need to be concerned about energy use. The U.S. Environmental Protection Agency invites you to attend an important one-day, informational and networking event. This meeting will provide an opportunity to learn about and discuss best practices, lessons learned, and energy performance achievements in the commercial and institutional markets. Also learn how to earn recognition by participating in the ENERGY STAR Challenge and committing to and achieving reductions in energy use of 10% or more.

You also will have the opportunity to hear about local incentive programs and recent ENERGY STAR developments that can make it easier and more cost effective to execute and gain support for a successful energy management program.

Industry experts will present case studies to illustrate how organizations have improved operations and optimized energy performance. Participants will have the opportunity to tour an ENERGY STAR labeled building.

There no cost to attend the meeting and lunch will be provided. Space is limited so please register by June 7, 2006 by logging on to the ENERGY STAR Web site at http://www.energystar.gov/index.cfm?c=networking.bus_networking_spring_2006.
